Nonlinear structural behavior may be associated with either geometric or material response, each described as follows: Geometric nonlinearity concerns the P-Delta effects associated with application of external loading upon the displaced configuration of a structure.

In statistics, nonlinear regression is a form of regression analysis in which observational data are modeled by a function which is a nonlinear combination of the model parameters and depends on one or more independent variables.

In mathematics and science, a nonlinear system is a system in which the change of the output is not proportional to the change of the input. Nonlinear problems are of interest to engineers, biologists, physicists, mathematicians, and many other scientists because most systems are inherently nonlinear in nature. Nonlinear dynamical systems ...
